ReadMe file for "*Delinking land rights from land use: Certification and Migration in Mexico*"

Authors: Alain de Janvry, Kyle Emerick, Marco Gonzalez-Navarro, and Elisabeth Sadoulet

Email kyle.emerick@tufts.edu or marco.gonzalez.navarro@utoronto.ca with questions. Note that our confidentiality agreement does not allow us to distribute data that is identifiable at the ejido level. Email marco.gonzalez.navarro@utoronto.ca with questions on how to request the administrative data at the ejido level.

Data Files (Stata 13 format):

1. progresa_hhdata.dta: Dataset containing household-level data from original Progresa experiment matched with ejido-level data on the rollout of the Procede program
2. locality_level.dta: Locality-level census data with population counts by locality (village). Data are matched to ejido-level data on the rollout of the Procede program
3. ejido_census.dta: Matched census of ejidos from 1991 and 2007. Data were further matched to ejido-level data on the rollout of the Procede program.
4. consumption.dta: Household-level data from the Progresa experiment containing consumption
5. landuse_satellite.dta: De-identified ejido-level data on land use from LANDSAT images. Data were matched to ejido-level data on the rollout of the Procede program.
6. Procampo2.dta: Ejido-level data on recipients and area covered at the ejido-level by Mexico's farm support program PROCAMPO. Data were matched to ejido-level data on the rollout of the Procede program.

Do Files:

1. 20130853_replication_code.do: do file that runs all regressions and generates all figures reported in both the main text and online appendix of the paper. The file uses the six datasets above.
